

Salt dough recipe...

You too could make your own family sculpture. You don't need expensive equipment, you can make salt dough!

Recipe

The dough will last for a long time in an airtight container kept in the fridge.

- 4 cups of plain flour
- 1 cup of salt
- 1-2 cups of hot water (from the tap)
- 2 teaspoons of vegetable oil

Mix the salt and flour together, and gradually add the water until the dough becomes elastic, then add the vegetable oil. If the mixture is too sticky, add more flour, if it's too dry, add more water. Knead the dough until it's a good consistency, then use your imagination to make your art.

To add interest you could add glitter or food colouring to the dough.

When you have finished your sculpture you can bake them in the oven at 200 degrees or gas mark 6. Baking times will depend on the size and thickness of your sculpture.

You can paint your sculpture with poster paint when it has cooled.
